

## RenoSan® 2000 Schwefel

### Product type (liquid):

Mineral calcium, magnesium and sulphur fertiliser

### Fields of Application and Use

- Greens, tees, fairways
- Sports pitches and lawn areas

### Application:

**Application period:** During the whole vegetation period

**Important: Shake or agitate thoroughly before use.**

RenoSan® 2000 – Sulphur is applied with a conventional sprayer and can be mixed with foliar fertilisers as well as all authorised fungicides, insecticides and herbicides.

Fill the tank up to 1/3 with water, switch on the agitator, and pour the required quantity of RenoSan® 2000 – sulphur into the induction hopper while filling the remaining quantity of water.

Never switch off the agitator while adding RenoSan® 2000 – sulphur before the tank is completely empty!

Immediately empty the sprayer completely after every application and rinse with water. When spraying tank mixtures, the other products should be added to the mixture at the end.

The application requirements and regulations of the added products must be observed.

### Application Rate

10 l/ha

### Storage

Store at 12-25 °C and protect from direct solar radiation.

Completely emptied containers are to be disposed of at authorised collection points.

### Liability

The manufacturer and distributors do not accept any liability for improper storage and use of the product.

### Safety Phrases

- Residual quantities are to be disposed of properly.
- Keep out of the reach of children.
- Store in a clean and dry place.
- Do not breathe in the spray mist.
- If swallowed seek immediate medical advice and show the label.

## RenoSan<sup>®</sup> 2000 Schwefel

Main component I	49 % sulphur S / total sulphur (700 g/l)
Form	Liquid
Colour	Yellowish-white
Behaviour in water	Suspension for spraying
Density (at 20° C)	1.41 kg/l
Safety data	See Safety Data Sheet 91/155EEC und 1999/45/EC
Health and safety	Detailed information on handling and safety measures that may need to be observed can be found in our EC Safety Data Sheet.
Storage life	1 year
Application	Year-round, except if there is frost
Packaging	10 kg bucket / canister
Packaging units	60 x 10 kg / euro pallet 600 kg
Packaging disposal	We can dispose of the cleaned containers upon request.
Storage	Frost-free, protect from solar radiation
Note	The information provided in this data sheet is not the production specifications and is given to the best of our knowledge. Possible variances cannot be fully ruled out. This information does not imply that the patents held by aqua-terra Bioprodukt GmbH or third parties are available for unrestricted use.
